### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,732,885 to Mathues in view of Fridman.

The claims of Mathues have all of the limitations of the instant application, but lack the external supply port (claims 1 and 14 of the instant application). Fridman shows a beverage dispenser with an external supply port 30 having a water filtration system similar to the one disclosed in the instant specification. It would have been obvious to one of ordinary skill in the art to provide the external supply port as taught by Fridman on the device of Mathues in order to allow for continued dispensing of a beverage when the bottled beverage supply runs out.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McCann et al. '296 and Ziesel show water boosting systems.
